Personal Profile

I'm an ambitious, flexible and hardworking person, really passionate and focused on full-stack Web development, comfortable on building RESTful APIs from scratch using MERN stack and with great attention to detail. I have been interested in programming and computing since I was nine years old and this led me to complete an IT Degree in my home country, Just IT self-funded professional web developer course and my passion for learning new languages and technologies stays imperishable, continuing to gain educational experiences in completion of IT degree at the UK's Open University.

I'm seeking to undertake web and software development tasks and challenges, full responsibly, for personal and career development. My first priority and challenge is to see myself as a senior full-stack developer as soon as possible gaining through my employment new skills and knowledge to progress further my career within a challenging environment.

Interests and Achievements

Computing: Since I was 9 years old I was writing programs on Basic and playing games on my AMSTRAD CPC 6128 or my friend's Spectrum, Commodore 64 and a bit later Atari ST and Amiga game consoles back to 80s and 90s. Since early on 21th century I use Internet and computers in a more advanced level and I also studied and became software, hardware and network technician. I use very efficient plenty of Operating systems, application and services like: Microsoft Windows, Mac OS, Linux, Microsoft Office, Visual Studio, Adobe Photoshop, Ableton, Sound Forge, Social Media, Remote connection services and many more. Except technologies and Web I have a big passion for music(mixing and production), cinema, sports and quality food.
